

Our automated profit recovery software for retail and grocery manages claims and returns lost capital – fast!

gainIQ
PREVENT

gainIQ Prevent continuous monitoring software is customized for retail and grocery businesses to identify and prevent payment errors in real time. Built to strengthen your internal process, **gainIQ Prevent** automatically delivers highly-targeted results that enable your staff to identify errors and irregularities before payment is made. Our proactive enterprise software system results in faster recoveries, stronger internal financial controls, and improved vendor relations.

Revenew handles the technical work needed to set up **gainIQ Prevent**. Just provide the payment and vendor files from your payment system, and we'll do the rest to get your system integrated – quickly and seamlessly.

\$1.75 million in duplicate payments and duplicate P-card expenses were recovered by a retailer using gainIQ Prevent.

PREVENT ERRORS

Revenew's web-based monitoring platform is effective for a full range of payment errors common in the retail and grocery industries, including duplicate payments, pricing errors, missed promotional allowances, and missed rebates. It automatically extracts and analyzes pending and historical payments on a continuous basis, pinpoints possible overpayments, and presents those results to your internal staff. **gainIQ Prevent** also comes with a robust claim management and tracking system so you can quickly generate and deduct claims, enabling swift return of lost capital.

IMPROVE PROCESSES

gainIQ Prevent also tracks the *reasons* why payment errors occur, helping to identify and understand their root causes. Our simple, intuitive dashboard allows you to view issue status and detailed metrics on the number and types of errors identified, along with reports to track results over time. The ability to identify and monitor areas of financial risk will strengthen internal controls and allow you to address these problems at the source.

MONITOR VENDOR FILES

Maintaining a clean, validated master vendor file can be difficult and time consuming. **gainIQ Prevent** includes a real-time vendor monitoring module that will catch and correct vendor record inconsistencies, mitigating enterprise risk and keeping your vendor master file under control for the long term.

Revenew's **gainIQ Prevent** web-based suite of specialized software will transform your payables function – allowing you to identify and prevent payment errors in-house, faster than ever before.

Revenew's Cost Recovery and Cost Containment services produce hard-dollar results for our clients – specific, tangible and often quite substantial. Please contact us today at 281-276-4500 or info@revenew.com to learn more. **You have everything to gain.**
